

Field work, group work and report

- Field work around Longyearbyen and Adventdalen
- Working in groups
- Together with the teachers and Ph.D. students, design your own
 - Research questions, aims and objectives
 - What data and measurements you need
 - How this fits with the learning goals

Ph.D. students are responsible for coordinating the groups

Field work, group work and report

- Group report in the form of a paper draft for a scientific journal
 - Meteorological applications:
<https://rmets.onlinelibrary.wiley.com/journal/14698080>
 - Use their formatting and “author guidelines”, Ph.D. students responsible for information and help

*Ph.D. students are responsible for help
with formatting the paper draft*

Field work, group work and report

- Oral presentations
 - Present your own work
 - Review work of the other group

Ph.D. students are responsible for helping with how to review a paper, both orally and written
